## Fluid shapes

Albino Miranda launched **Gansk** - a new lighting and furniture brand designed for Indoor and Outdoor environments, in order to serve markets that look for something simple and elegant, proposing innovative, modern and sophisticated fiberglass furniture. Gansk's products are produced by hand, in a rigorous process that ensures their quality, and are mostly made of fiberglass-reinforced resin, an innovative and highly resistant material, which, when combined with noble materials such as wood veneers, marbles, brass, etc, give each product this unique identity and the ability to adapt to the most varied decorative environments. Gansk's versatility is also a strong feature, allowing each customer to adapt their pieces to the needs of their decoration, both in terms of finish, size and shape.

[www.gansk.pt](http://www.gansk.pt)

"Each piece is a work of art, a balance between contemporary design with the old handwork techniques of the craftsman."

Albino Miranda, CEO and sculptor
